The above mentioned school is currently planning to launch a computer centre at our school to enable our educators and learners to become more computer literate.

We have quite a few educators that have not worked on a computer and even learners that have never even seen a computer before and it is often required from the department that all our educators need to be equipped with the modern methods of a computer.

We are currently in possession of only two computers as our poor finances makes it impossible for us to purchase any computers at the moment due to the lack of school fees and fundraisers at the school. We live in a very poor community and 80% of our learners are from Wallacedene, an informal settlement in Kraaifontein.

Poverty and unemployment is very rife in the area and these factors make it impossible for the parents to pay school fees or to contribute towards any form of fundraising.

We therefore have to reach out to the broader community for assistance and we ask that you help us with a donation of a computer or computers to enable us to get up to speed with the modern technology used at our schools.

Your donation would be highly appreciated.

Thanking you in anticipation.
